EDUCATION BACKGROUND

Master in Software Engineering, Zhejiang University, China	09/2017-present
Bachelor in Chemical Engineering and Technology, Yanbian University, China	09/2013-06/2017
Exchange Program in IT Education, Kangwon National University, South Korea	02/2016-07/2016

PROJECT EXPERIENCE

ZJU Intelligent Blog System 08/2017-present

- Develop a blog system by Python WEB framework with functions of article publishing, viewing, question answering, comment, Taobao guest, question bank, code center and so on. Its greatest feature is that it integrates machine learning algorithm to realize automatic abstraction, keyword extraction and other functions, and also integrates incremental crawler technology to achieve automatic updating of Taobao guest and question bank.
- Main tools used: Django, Nginx + Wsgi, Sklearn
- Software Copyright No. 2017SR101153 (version 1), 2017SR577667(version 2)

Anycodes Online Programming Platform 08/2015-02/2018

- Develop an online programming software. Users can edit and compile C, C++, Java, Python and other nine languages on-line at anytime and anywhere through mobile client, Wechat account and Web pages. The platform also has the functions of code download, image output, communication forum and online evaluation. As of Aug. 2018, the total number of downloads by mobile clients was 320,000, and the number of web page requests exceeded 10,000 per day.
- Main tools used: PHP, Django, Docker, Webview
- Software Copyright No. 2015SR164783, 2017SR105637, 2017SR462051, 2017SR070853

WORK EXPERIENCE

Strategic Product Manager, Didi Chuxing 11/2018-present

- Mainly responsible for the pricing of designated driving products and the business development in cities
